PROJECT

- **Digital Gram Panchayat**

Digital Gram Panchayat is a web application that is specially designed to establish an environment, wherein village public can easily communicate with the village councils. Our application features: administrator and village public. Administrator will handle the whole website and manage the activities of users, it will update panchayath services, application and complaints filled by public. The village public will register to the application and avail for the facilities. We have used C# and SQL server as backend.

ACTIVITIES

- Participated in State level Event MAP-FEST Project Competition held by Matroshri Asarabai Polytechnic, Nashik
- Online session of Advanced Java & Python
